

Introducing

ONLINE VITALITY™ drop down MANAGER™

Give sub-administrators the power to edit drop down lists!

manage DROP DOWN LISTS

Online Vitality's Drop Down Manager Component allows administrators and sub-administrators to add and edit drop-down lists / select lists associated with metadata fields.

Once the Drop Down Manager Component is installed, users will be given a new button on the Administration screen. This new button will launch the Drop Down Manager, and users will be able to add new elements to drop down lists as well as edit existing ones. There's no longer a need to go through a system administrator!

easy INSTALLATION

Drop Down Manager installs quickly and easily to your Stellent Content Server. To install, simply upload the component, enable it, restart the server, and the Drop Down Manager is ready for use!

further CUSTOMIZATIONS available

The Drop Down Manager can be further customized to accommodate additional features and functions that may be needed by your organization.
